# MAPPING “THE SMART PATH TO SUSTAINABILITY”

## The smart path to sustainability

### **Mainstreaming sustainability through accessible, forward-thinking solutions.**

GLOBALG.A.P. as a one-stop-shop with solutions that are:

- relevant to the industry and collaborative in development
- providing producers with maximum market accessibility
- flexible and global in perspective
- holistic in approach
- practical and easy to implement
- cost-effective and contributing to the removal of duplication
- digitalized and data-driven
- trusted through a high level of integrity and transparency

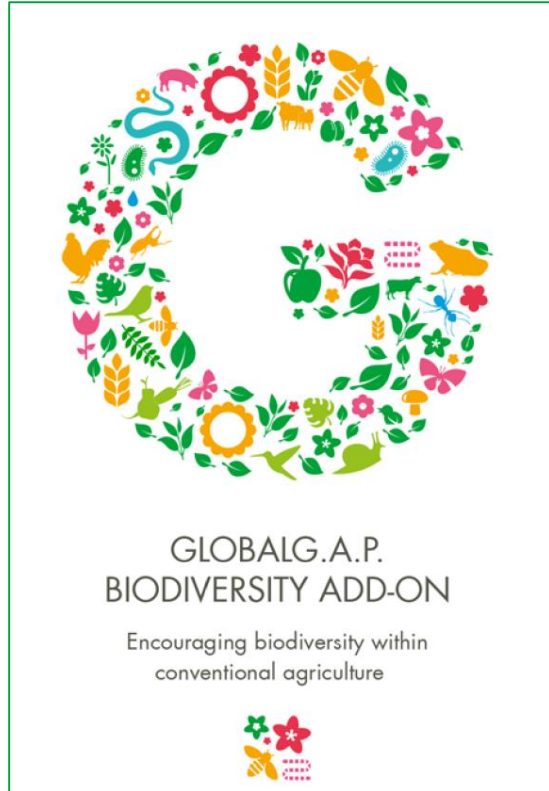

### **Understanding sustainability as journey, not a destination.**

A defined path provides:

- navigation
- alignment on actions
- measurement of progress and impact along the way
- opportunity for continuous improvement

# THE BIODIVERSITY ADD-ON, LAUNCHED IN APRIL 2022

# BIODIVERSITY ADD-ON CONTENT

## Systematic and simple control points

The add-on aims to **balance process, content, and output with 11 topics:**

- Biodiversity representative
- Farm self-assessment on biodiversity
- Biodiversity action plan
- Training, knowledge sharing, and capacity building
- Farm-specific biodiversity advice
- Integrated pest management
- Farm areas dedicated to biodiversity
- Protection, restoration, and other practices
- Soil and nutrient management plan
- Wastewater management and water sources
- Off-farm synergies, communication, and collaboration
